

TUT – 60E

CARACTERÍSTICA

The TUT-60 Series security turnstiles are suitable for high volume, abusive conditions. The turnstiles can be mechanically or electrically operated, and are designed to interface with any access control device.

CHARACTERISTICS

- Deluxe electric turnstile designed for easy interfacing with access control devices
- One-way electric with free or locked exit or two-way independently electrically controlled for entry and exit
- Heavy-duty, modular, self-centering mechanism ensures long-life and minimum maintenance
- Includes reader interface and low voltage 24 VDC power supply
- Supplied fail-lock, fail-safe or any combination
- Available in powder coated carbon steel (TUT-60EC, EC2) or complete stainless steel (TUT-60ES, ES2): lockable stainless steel cover has concealed hinges
